

Joint Junior Faculty and Doctoral Consortium Announcement 2011

Academy of Management Operations Management (OM) Division

The Operations Management Division is proud to announce a joint session of junior faculty and doctoral consortium at the annual Academy of Management (AoM) conference in San Antonio, Texas. This event will be held from 9:00 AM to 4:30 PM on Saturday, **August 13, 2011**. The AoM Conference is the premier venue for empirically focused OM research.

An innovative format is going to be used this year in that all participating junior faculty and doctoral students are going to stay together throughout the day. A group of distinguished OM scholars will serve as faculty mentors, and the junior faculty are also expected to share their experiences with the doctoral students.

The joint consortium is primarily composed of two integrated sessions. After a welcome breakfast, the morning session invites junior faculty to present their research prospectus that may include a description of how they are extending their dissertation research and starting new research streams. The doctoral students are expected to ask questions and learn about life after dissertation. After lunch, the afternoon session will follow an intensive research incubator format. Students will present their research proposals to a panel of senior and junior faculty which will provide feedback and guidance on each proposal. All participating faculty will be asked to read student proposals in advance.

Doctoral students and junior faculty doing research on any Operations Management topic may participate. Space is limited. Preference will be given to students and junior faculty employing empirical research techniques. Students who have attended other doctoral consortia find this consortium uniquely beneficial due to its sole and intensive focus on developing research. In our innovative format, junior faculty are put in a unique position of receiving advice from senior faculty as well as acting as mentors for doctoral students.

We ask applicants to submit the following: vita (all), full contact information (all), advisor's contact information (doctoral students only), a one-sentence statement on your stage in the doctoral program (doctoral students only), a one-page summary of your dissertation research (doctoral students only) and a one-page research prospectus (junior faculty only). Junior faculty should send their electronic applications to Hale Kaynak and doctoral students to Arash Azadegan. Applications will be accepted through May 30. Applications will be acknowledged via email by June 10.
